Work History

Software Engineer at Maharishi Foundation International

April 2022 to August 2025

- Architected a full stack booking platform and owned key features using HTML, CSS, JavaScript, TypeScript, React.js and Next.js resulting in a scalable system for course registration.
- Designed and managed AWS microservices using Node.js GraphQL to implement RESTful APIs and DynamoDB integrations for high-traffic user data and automation systems.
- Automated comprehensive CI/CD pipelines using CircleCI and Docker providing a streamlined developer workflow and faster integration of new features.
- Implemented end-to-end and unit testing using Cypress and Jest, and error tracking using Sentry to maintain a high-quality product.
- Worked in an agile non-profit startup environment collaborating across teams using Git for versioning and Jira for project management.
- Provided direct mentorship and onboarding to junior and senior engineers while performing daily code reviews, enabling immediate productivity and ensuring new hires met initial performance milestones within the first month.
- Developed features and bug fixes for a React Native app, improving user experience on both Android and iOS.
- Led the implementation of a design system and created a reusable component library using Figma, Tailwind, and Storybook, which enhanced UI workflows and ensured consistency across all products.
- Architected a flexible template system using Prismic CMS to enable non-technical teams to manage and publish content autonomously

Software Engineer Contract Projects

December 2017 – March 2022

- Designed and developed a customizable online ordering site for a hospital using Wordpress, PHP, WooCommerce and relational databases (RDBMS) using SQL allowing them to order business and appointment cards efficiently
- Managed and maintained the company websites nongmoreport.com and nongmosourcebook.com, using WordPress, PHP, and jQuery to ensure they remained current and fully functional
- Designed and maintained a HubSpot website for a meditation retreat organization using HTML/CSS and Adobe Creative Cloud, making it simple for visitors to find and register for retreats

Education

MBA (Business Process Improvement) M.I.U., Fairfield, IA

Status - Graduated
